Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 3 is objected to because it is not clear if the agent recited is the same as the agent recited in parent claim 1. Clarification in the claim language is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Igarashi (Japanese Patent 2000-319657).

Igarashi discloses spraying an asphalt substance on a surface while moving over the surface. The asphalt would inherently produce emissions. A liquid agent (water, cement, EVA polymeric adhesion booster) is then released. The molecules of the agent would inherently mix with the particles in the emissions.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3671

Claims 1, 3, 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Corcoran et al. (U.S. Patent 5,342,143).

Corcoran et al. discloses a method of controlling emissions during asphalt paving, wherein an asphalt substance is sprayed on a surface while moving over the surface. Because there is no recitation with respect to a time interval recited, rain falling on the surface at any point after the asphalt substance had been laid down would meet claim recitations.

Regarding claim 3, because there is no correlation to any other process step, the limitation recited could be met by a completely unrelated process. Because it is known to mix liquid agents with water in the ratio recited, the claim limitation is met. In order to overcome this rejection, applicant must relate this process limitation to the process in the parent claim.

Regarding claim 6, it could rain at a rate meeting the claim limitations.

Allowable Subject Matter

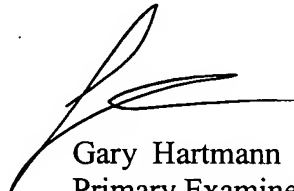

Claims 2 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gary Hartmann whose telephone number is 703-305-4549. The examiner can normally be reached on Monday through Friday, 9am-6pm.
